65	What is the term for gradual increase in Earth's average temperature due to human activities?	Global Warming	Ozone Depletion	Climate Change	Acid Rain	As per the candidate correct answer is a	<p>Global temperature rise from 1880 to 2022. Higher-than-normal temperatures are shown in red and lower-than-normal temperatures are shown in blue. Each frame represents global temperature anomalies (changes) averaged over the five years previous to that particular year. Credit: NASA Goddard Space Flight Center/NASA Scientific Visualization Studio/NASA Goddard Institute for Space Studies.</p> <p>The terms "global warming" and "climate change" are sometimes used interchangeably, but "global warming" is only one aspect of climate change.</p> <p>"Global warming" refers to the long-term warming of the planet. Global temperature shows a well-documented rise since the early 20th century and most notably since the late 1970s. Worldwide since 1880, the average surface temperature has risen about 1°C (about 2°F), relative to the mid-20th century baseline (of 1951-1980). This is on top of about an additional 0.15°C of warming from between 1750 and 1880.</p> <p>"Climate change" encompasses global warming, but refers to the broader range of changes that are happening to our planet. These include rising sea levels; shrinking mountain glaciers; accelerating ice melt in Greenland, Antarctica and the Arctic; and shifts in flower/plant blooming times. These are all consequences of warming, which is caused mainly by people burning fossil fuels and putting out heat-trapping gases into the air.</p>	C
66	Which of the following is an endangered species?	House cat	Kiwi	Sparrow	European Rabbit	As per the candidate correct answer is d	Oryctolagus cuniculus (European Rabbit) is a species of mammals in the family Leporidae. They are listed as endangered by IUCN.	D
